

# So Incredible

Ilse DeLange

In the middle of the day  
When the sun is aching  
And I try to make my way  
But the sidewalk's breaking  
Watch me slip between the cracks  
As I fall and fall and fall  
And I wonder where I'll land  
If I ever land at all

Oh, there's your hand

So incredible, the love we have  
The things we hold, let's make them last  
You pull me through  
When I get stuck in other little distractions  
So incredible  
So incredible

In the middle of the night  
When the stars all gather  
They conspire with the sky  
I'm sure it's me they're after  
Try to steal away my dreams  
Keep them for themselves  
As I'm stirring in my sleep  
Please just help me wake up

Oh, there's your hand

So incredible, the love we have  
The things we hold, let's make them last  
You pull me through  
When I get stuck in other little distractions  
Everything happens, I still know  
So incredible

Everything that we know  
Spinning out of control  
You never let me go  
Oh, oh, oh

So incredible, the love we have  
The things we hold, let's make them last  
You pull me through  
When I get stuck in other little distractions  
Everything happens, I still know  
So incredible  
So incredible

So incredible
