

Closer

Imago

I knew we wanted something more
My heart is ready to shine
Like it's never done before, ooh
I love the way you make me fly
One shot, this is the moment
We've all been waiting for, ooh

Are you with me, come closer
Are you ready to discover

Every moment gets better
When I feel this much for you tonight
Every moment gets better
Come again even closer and closer

Closer, closer

I want to savor it all tonight
One shot, we make it stand
No matter where we go, ooh
I love the way you take your time
One smile, this is the moment
We've all been waiting for, ooh

Are you with me, come closer
Are you ready to discover

Every moment gets better
When I feel this much for you tonight
Every moment gets better
Come again even closer and closer

Every moment gets better
When I feel this much for you tonight
Every moment gets better
Come again even closer and closer

Closer, closer

Oh who, oh who (4x)
