

# We Own The Night

Impellitteri

It's time to rock, let's tear it up!

The night is falling and the moon is full  
And the boys are out running the street  
All you hear is the call of the wild  
And the gangsters are feeling the heat

You'll never know until you realize  
We're taking back the streets

We own the night, we own the night

We slay the stage at the hour of dark  
When the creatures are coming forth  
We cast a spell on the shadows edge  
In a trance they'll be wanting more

You'll never know until you realize  
We're children of the light

We own the night, when the band is playing hard  
We own the night, everybody's in the line of fire  
We own the night, we're gonna tear up this whole town  
We own the night, when the band is rocking  
You know its right, we own the night

You never know until you see the light  
It's all happening here

We own the night, when the band is playing hard  
We own the night. everybody's in the line of fire  
We own the night, we're gonna tear up this whole town  
We own the night, when the band is rocking  
You know it's right, we own the night  
We own it, we own the night
