## **Blade**

## **Imperanon**

From the flames of a burned down heart Ripped off and torn apart Life to ashes and life to death I twist the blade and take your breath

In the twist of blade I feel The passion to hate arising

Cruelest mind, my thoughts are running through Deepest fear, no light shines on you Son of no one and breeder of fear I'm coming to take you away Shadow hearted, me, wild one

Bringer of pain and darkest despair I'm heading towards the day That your last wish is to be done

Through my blade I live my life Your salvation in flash of my knife Til the last drop I make you crawl You?re good as dead so fear no more

In the twist of blade I feel The passion to hate arising

Cruelest mind, my thoughts are running through Deepest fear, no light shines on you Son of no one and breeder of fear I'm coming to take you away Shadow hearted, me, wild one

Bringer of pain and darkest despair I'm heading towards the day
That your last wish is to be done

Cruelest mind, my thoughts are running through Deepest fear, no light shines on you Son of no one and breeder of fear I'm coming to take you away Shadow hearted, me, wild one

Bringer of pain and darkest despair I'm heading towards the day That your last wish is to be done
