

I felt you breathe from across the room  
Intoxicated by the way you moved  
Let's disappear  
Baby together we can disappear

Sit back relax and watch the blues collide  
The same desire inside a new design

All my life I've never felt so alive  
I've got so much on my mind nothing I would try to put to tune  
Or keep in time  
Where the ocean meets the sky dressed in lights  
But I can barely see your eyes in the moonlight

Sit back relax and watch the blues collide  
The same desire inside a new design

All my life I've never felt so alive  
I've got so much on my mind nothing I would try to put to tune  
Sit back relax and put the car in drive  
We'll use the headlights as our guides  
We'll sleep under the stars tonight  
Sit back relax and watch them shine

Backs break with the waves  
Backs break with the waves  
Backs break with the waves tonight

All my life I've never felt so alive  
I've got so much on my mind nothing I would try to put to tune  
Sit back relax and put the car in drive  
We'll use the headlights as our guides  
We'll sleep under the stars tonight  
Sit back relax and watch them shine  
Sit back relax and watch them shine  
Sit back relax and watch them shine
