

Through My Eyes

In Flames

You did me wrong and I applauded you
I became a blade and I pierced through
Now hiding from the world outside
Trying to create magic for the pacified

You never felt the answers
Are aimed at you my friend
Did you find yourself lost
In a world we swore to protect

If you can see it
If you can see it through my eyes
Why are we so different
Want you to feel it
Why you should know what it was like
Then maybe you'll understand

You always did preferred to keep me on distance
So no wonder if it's a surf on your intents

You never felt the answers
Are aimed at you my friend
Did you find yourself lost
In a world we swore to protect

If you can see it
If you can see it through my eyes
Why are we so different
Want you to feel it
Why you should know what it was like
Then maybe you'll understand

If you could see it through my eyes (2x)

You never felt the answers
Are aimed you my friend
Did you find yourself lost
In a world we swore to protect

If you could see it
If you could see it through my eyes
Why are we so different
Want you to feel it
Want you to know what it was like
Then maybe you'll understand

If you could see it
If you could see it through my eyes (through my eyes)
Why are we so different
Want you to feel it
Want you to know what it was like (it was like)
Then maybe you'll understand
(Then maybe you'll understand)
