Around the world A world to me And yet no home For you don't see: You compromise Our legacy

By your actions you'll be known No commitment to our space of life The world we see - our home to be! No machinery will save us It's got to be a mutual sympathy

And I don't wanna live in an empty place Where the beaty lies in memories Disappeared into thin air...

Waste no time, we're on the brink Live the dream we always dreamed

Ain't no hopes in a world concrete Where the children of tomorrow Bank on the future of today

I don't wanna live in an empty place Where the beaty lies in memories Would you?!

Beyond recall...

Waste no time, we're on the brink Get in action and defend our future Live the dream we always dreamed Ain't no other planet home The only one!

Countless surrounding stars And still no similarity...

I don't wanna stay at an empty place! Where the beauty lies in memories Don't let them kill our dreams Make our dreams concrete!

Waste no time we're on the brink
We're on the brink beyond recall
Get in action and defend our future
Live the dream we always dreamed
We always dream
Ain't no other planet home
The only one!
