

As Long As It's You

Incognito

Something 'bout April
That makes me come alive, yeah
May have been the winter
That made my heart so still
It must have been, must have been
What wakens us all to wonder
I don't really know?
But the best days of my life
Are the one's I spent with you
So continue to surprise me
Baby, I'll do the same for you, ooh
I won't question why it feels so good
I'll let the mystery be
As long as it's you
As long as it's you
Any time, anywhere, I don't care
Just as long as it's you, oh ooh, yeah
Thank you for your understanding
I know my love can be so demanding, I know that it can
Yes, I know that it means so much to you
Baby, when I treat you right and I'm holding you tight
Tears of joy come to your eyes
Like stars about to fall
Continue to still want me
The way I still want you
I won't question why it feels so good
I'll let the mystery be
As long as it's you
As long as it's you
Any time, anyplace, I don't care
Just as long as it's you, oh oh
