

Silent Side Of You

Index Case

Everyone keep those fingers crossed
But don't drag your feet through this walk
Because you would hate to get your ankle caught
Watch the perfect pass you by
They'll get in line and soon forget
We get the same surprise on the
Other side of you

If we're all a part of time
Then you've already wasted mine
So close to the end of our minds
If we're all a part of time
Then you've already wasted mine
Keep holding until I compromise

I found control and the things you stole
Don't forget who you've told
Because they'll deny when the angels cry
The sound of fire the silent side of you

If we're all a part of time
Then you've already wasted mine
So close to the end of our minds
If we're all a part of time
Then you've already wasted mine
Keep holding until I compromise

Why would you try to find something new
How did I end up following you
If everything I say is wrong
The silent side of you is gone

If we're all a part of time
Then you've already wasted mine
So close to the end of our minds
If we're all a part of time
Then you've already wasted mine
Keep holding until I compromise
