

## Pendulum

### Infected Rain

Stay away from temptation's dark sinister cloud  
That three-headed monster will suck your life out  
Its tentacles drain the life from the living  
Making lies the easiest place to hide in

Learn to stay tall and proud even when tired  
Even alone, when thrown to the wolves  
Even when you're hostage of desire and fire  
Never forget the real face of your dreams

Learn to appreciate it, learn to see it  
Open your mind and try to feel it  
It's hard and cold against your skin  
Sharp and bold, the pain you feel

The significance of this thin line  
Pendulum between reality and lie  
Pendulum between day and night

Stay away from temptation's dark sinister cloud  
That three-headed monster will suck your life out

Learn to stay tall and proud even when tired  
Even alone, when thrown to the wolves  
Even when you're hostage of desire and fire  
Never forget the real face of your dreams

The significance of this thin line  
Pendulum between reality and lie  
Pendulum between day and night

You see, the night is mysterious, magical  
Only because of the clear brightness of the day
