The Life Game

Infected Rain

Hey, little child
Tell me about your pain
Tell me about your nightmares
And fears you can not stand
Tell me about the time
When you were weak and lost
Tell me about the monsters
That scared you in the past

Thoughts are consuming you Words are killing you Mercy is just a lie We all live in sacrifice

You were born in this world Of misery and hate You have learned to fly In this cruel dirty sky

You don't belong to this world You don't belong to this time When you are alone You're getting out of your mind

Come here and play
I know you wanna stay
I know you've tried
You'll be free and pass the line

Here she is in a deep, deep darkness She's alone, empty, colorless Breathing to loud Scream without a sound

You don't belong to this world You don't belong to this time When you are alone You're getting out of your mind

Cry!

You don't belong to this world You don't belong to this time When you are alone You're getting out of your mind

Come here and play
I know you wanna stay
I know you've tried
You'll be free and pass the line

Hey, little child
Tell me about your pain
Tell me about your nightmares
And fears you can not stand
Tell me about the time
When you were weak and lost

Tell me about the monsters That scared you in the past
