

Enforce The Clones (Kill The Copy)

Ingrowing

Kill your fucking copy, enforce your fucking clone
It's not his perfect flesh or his precise unique bones
Crush your hated mirror trying to steal your face
Erradicate them, that earthly life's disgrace

Let's enforce the clones
Their blood is not yours
Deriding the God, raped Nature base
Sodomized human race...

Kill your fucking copy now
Final slaughter started, you're not alone
Scatter cloned bodies, go!

Show no fucking mercy, their blood will turn to waste
An artificial cancer, eliminate all these deadly cells
Keopaa will lead our steps through warped genetic hell

Survive... or not survive
Originals must be safe
Victory... or low life
Mastermind by your chafe

Kill your fucking copy, enforce your fucking clone
It's not his perfect flesh or his precise unique bones
Crush your hated mirror trying to steal your face
Erradicate them, that earthly life's disgrace
