

I Want to Know

Inhabited

Are you here, you here, you here with me
Are you here, you here, you here with me
I need to feel you here, feel you here with me

You're everywhere I go
You are the water that heals the broken soul
You're in the whisper that moves the leaves
You're in a stranger's smile I meet on the streets
But I need you here, I need you here
I want to know, I want to feel
I want to see you move underneath my skin
I want to hear, speak to me
I want to feel you breathe, I want to feel you breathe
through me

You're everywhere I go
You are the fire that burns and takes control
You're in the words that bring me life
You're in the starlit sky that sings in the night
But I need you here, I need you here

I want to know, I want to feel
I want to see you move underneath my skin
I want to hear, speak to me
I want to feel you breathe, I want to feel you breathe
through me

Won't you come and breathe through me
Won't you come and sing through me
I'll wail, I will wait for You
And there's nothing that can change my mind
I've seen your face a thousand times
I believe in You
I believe in You
And there's nothing that can change my mind
I've seen your face a thousand times
I believe in You
I believe in You

I want to know, I want to feel
I want to see you move underneath my skin
I want to hear, speak to me
I want to feel you breathe, I want to feel you breathe
through me
