Set in this wave of summer, loving the things you are Wiping the smile off all the things I want to do to you Pressure inside gets thicker, my head and my damned actions Drawing a line between her eyes to find some truth in here

```
Around we go, around we go
Around we go, around we go
Around we go, around we go
```

Soaking it all with silver, I'm glad we finally met This emotion doubles up to make us feel again Finding life in substance, in the dark we turn Passing round this hold you pulverise, we hide ourselves

```
Around we go
```

```
Around we go, around we go Around we go, around we go Yeah
```

Around we go, and around we go Around we go

```
Around we go
Around we go, around we go
Around we go
Around we go, around we go
```
