Blade Of Triumph

Iron Fire

From the sea we attack
In the center of pain
We all fall under one flag
Never beaten nor slain
Breathe the fire of Odin
Spit the poison of death
Dive into the fire wind
Cut the belly of the beast

Lord of lightning, bringer of storm
Give us strength to carry on
To live and die without fear
Now matter how it hurts

Alliance from the north
We are brothers of Thor
The hammer and the sword
Will bring slaughter and gore
Will the battleships return
And the angels are burned
We drink the wine of gods
To the blade of triumph

We charge from the sea
Under the stars we belong
Among the gods we will be
United, standing strong
Die in the battlefield
Under Odin's command
Resurrect the ancient gods
And bring glory to our land

Lord of lightning, bringer of storm
Give us strength to carry on
To live and die without fear
Now matter how it hurts

Alliance from the north
We are brothers of Thor
The hammer and the sword
Will bring slaughter and gore
Will the battleships return
And the angels are burned
We drink the wine of gods
To the blade of triumph

We drink the blood of triumph

Defend the land and embrace the sky
The water blue and the fire from hell
Shadows of death and the angels will fly
Together we fight and break the spell

Your voice will be heard
The wings of victory
We come as one and split the sky is two
Like the eyes of a lion

And the horns of a mighty bull
Like a comet that rips the sky to pieces

With the blade of triumph

Lord of lightning, bringer of storm
Give us strength to carry on
To live and die without fear
Now matter how it hurts

Alliance from the north
We are brothers of Thor
The hammer and the sword
Will bring slaughter and gore
Will the battleships return
And the angels are burned
We drink the wine of gods

Alliance from the north
We are brothers of Thor
The hammer and the sword
Will bring slaughter and gore
Will the battleships return
And the angels are burned
We drink the wine of gods
To the blade of triumph

Our quest has just begun
Children of the sun
It has just begun
