Follow The Sign

Iron Fire

Just like the road that leads to nowhere Riding the time like there is no tomorrow Obey the voice that speaks from the inside Through the darkness and into the light

From the shadows and the underground
From the dungeon faith is rising
The spell is broken and the curse is gone
A deadly omen back from the past
The clock is ticking - end of the hourglass
Time for justice, now it's payback
It's the calling and the gathering
Dawn of glory - no fear nation

The ghost of failure is dead and gone with the wind Guardian angel spread your wings and fly away

Just follow the sign Through fire and water Follow the sign

Follow me

Like an arrow through the thunderstome In lightning heaven just like lightning See it coming, with the speed of sound In the moment a free spirit

The ghost of failure is dead and gone with the wind Guardian angel spread your wings and fly away

Just follow the sign
Through fire and water
Follow the sign
Through pain and slaughter
Metal is rising here tonight
Metal is rising you see the light

The crusade that never dies
Is been here since the dawn of time
Metal troops you can defy
The time is right here tonight

The crusade that never dies
Is been here since the dawn of time
Metal troops you can defy
The time is right here tonight

Just like the road that leads to nowhere Riding the time like there is no tomorrow Obey the voice that speaks from the inside Through the darkness and into the light

And fly away

Just follow the sign Through fire and water Follow the sign
Through pain and slaughter
Metal is rising here tonight
Metal is rising you see the light

Metal is rising
