

# Ghost from the Past

Iron Fire

Are you caught up in a long and winding road  
Controlled by another selfish heavy load  
Only stirring towards your final release  
In order to control this mental disease

Deep inside there is blazing thunder  
When the devil tries to pull you under

I've been haunted by demons  
I've been traded for nothing at all  
But found my revenge at last  
Just like a ghost  
A ghost from the past

Ghost

Burning the bridges will do you no good  
But stay to be broken is misunderstood  
The fate of fire shows the way to salvation  
Before you cross the line to eternal damnation

When fear is wrapped around your heart  
The pain and grief will tear you apart

I've been haunted by demons  
I've been traded for nothing at all  
But found my revenge at last  
Just like a ghost  
A ghost from the past

Bring about your deepest fear  
Your deepest hate and trust in fate  
So let it out and be a better man  
And if you can, don't run away  
To a darker day, to a shallow life  
Cause if you only strive for perfection  
You'll find the devil's paradise

I've been haunted by demons  
I've been traded for nothing at all  
But found my revenge at last  
Just like a ghost  
A ghost from the past

Ghost from, from the past  
Ghost from, from the past
