

Tornado of Sickness

Iron Fire

Just when you thought life couldn't get worse
A twist of fate, the fall of humanity
Now we are all bound to the same curse
The plague, god forsake
Deep inside we all knew the risk
Went too far into the unknown
Now we are all on top of the black list
Extinction, damnation

Rising together, burning forever
In smoke and dust all life will crawl

Tornado of sickness
Will come for us all
Embracing the madness, acknowledge the fall
While you pray to your god and your friends get ripped apart
In the end we all ride the tornado of sickness

A countdown to the final sunrise
The gallows end the hangman's lullaby
The time is up, meet your demise
Tight rope, lost hope
The extinction of every single man
A long walk into insanity
Riding shotgun with misery in command
Hostile, death smile

Rising together, burning forever
In smoke and dust all life will crawl

Tornado of sickness
Will come for us all
Embracing the madness, acknowledge the fall
While you pray to your god and your friends get ripped apart
In the end we all ride the tornado of sickness

Tornado of sickness
Will come for us all
Embracing the madness, acknowledge the fall
While you pray to your god and your friends get ripped apart
In the end we all ride the tornado of sickness
