

# Brother In Arms

Iron Savior

Far away  
Beyond the abyss  
In the kingdom made of machines  
Brothers in spirit  
Allied in arms  
I must depart as foreseen  
World after world  
Dies in the fire  
The killing must come to an end  
Darkness falls  
On the Galaxy  
Proclaiming the final stand

Journey into the darkness  
Throughout the endless unknown  
Once again I'm leaving the ground  
Facing the mission alone

Brother  
Brother in arms  
I am the Savior  
Follow the call  
Brother  
Brother in spirit  
Bring down the hammer  
And follow the call  
Mighty one under the sand  
Come and lend me your hand  
Lend me your fist  
And come with me  
To ride out the victory

On cosmic torrents  
I'm rising ahead  
Speeding at faster than light  
Fulfilling the prophecy  
And banish the upcoming night

Alone on the journey  
Like so often before  
My circuits are gleaming  
In overload  
And now I'm coming ashore

Brother  
Brother in arms  
I am the Savior  
Follow the call  
Brother  
Brother in spirit  
Bring down the hammer  
And follow the call  
Mighty one under the sand  
Come and lend me your hand  
Lend me your fist  
And come with me  
To ride out the victory

Time is running out  
On all man and all machine  
We must fulfill the prophecy  
This is our destiny

Brother in spirit  
Come with me  
To ride out the glorious victory
