

## Help Save The Youth Of America

Jackson United

help save the youth of America  
help save them from themselves  
help save the sun-tanned surfer boys  
and the Californian girls

when the lights go out in the rest of the world  
what do our cousins say  
they're playing in the sun and having fun, fun, fun  
till Daddy takes the gun away

from the Big Church to the Big River  
and out to the Shining Sea  
this is a land of Opportunity  
and there's Monkey Trial on TV

a nation with their freezers full  
are dancing in their seats  
while outside another nation  
is sleeping in the streets

help save the youth of America  
help save the youth of the world  
help save the boys in uniform  
their mothers and their faithful girls

listen to the voice of the soldier  
down in the killing zone  
talking about the cost of living  
and the price of bringing him home

and the fate of the great United States  
is entwined in the fate of us all  
and the incident at New York City proves  
the world we live in is very small

and the cities of Europe have burned before  
and they may yet burn again  
and if they do I hope you understand  
that Washington will burn with them
