Just say the words I'm on my way
Loving and touching, I got it baby, what you need
Just say the words I'm on my way, yeah

You don't gotta lie I can see it in your face
Say that you should probably go, but I know you wanna stay
Ooh...

Pull up on the side I got time if you need
Know I got my ways anytime that you need

Then all of a sudden it's morning
With you, wake me up in the morning, with you

You know that I got em
Said he caused you problems
Need me there to solve em

Now we waking up to every sunrise

She don't wanna be alone
Ain't no rush now
Don't know when she going home but

Come and go when she please
I'm the only the one that give her what she needs
