

Dark Star

James Iha

Can't stop falling, my seams are showing through,
surround me I feel new
Hours are slowing, the air is warming diffused,
beneath a paper moon

You spin around and sway, you trip the falling light
Dark star gone astray, won't you shine with me tonight

Day ascending, lightning sending me love,
is it me you're dreaming of?
Is this morning? tell me everything true, intoxicating you

You spin around and sway, you trip the falling light
Dark star gone astray, won't you shine with me tonight
Oh darkness fall away, I know by second sight
Our paper moon will wane, I tried to say good night

Good night sorrow, say good byes for tomorrow
I'll be sailing around your sun,
may tomorrow never come

You turn around and sway, you trip the falling light
Dark star gone astray, won't you shine with me tonight
You turn around and sway, you trip the falling light
Dark star gone astray, won't you shine with me tonight
You turn around and sway, you trip the falling light
