

# You See My Light

Jamie Lidell

You see what shines in me  
You see what shines  
You see the light in me  
You see the light

It runs right through me  
Right through my hands  
So I can see me  
Oh I understand

But you see my light  
And you see my light

What I see is darkness  
What you see is my core  
When you see my darkness go  
You see me whole

What I thought was empty  
You all to war  
You see so much in me  
When I see nothing left at all

And I feel lift in me with an open hand  
And I ought to trust my soul with your open hand  
And in this moment I understand  
In this moment I truly learn of the hand  
How much I love you
