You See My Light

Jamie Lidell

You see what shines in me You see what shines You see the light in me You see the light

It runs right through me Right through my hands So I can see me Oh I understand

But you see my light And you see my light

What I see is darkness What you see is my core When you see my darkness go You see me whole

What I thought was empty
You all to war
You see so much in me
When I see nothing left at all

And I feel lift in me with an open hand
And I ought to trust my soul with your open hand
And in this moment I understand
In this moment I truly learn of the hand
How much I love you
