

## take care

Jasmine Thompson

There's courage when you leave behind what you know  
There's courage when someone has to stay at home  
And I'm furious that I still have your back while you're staggering away from me  
I'm furious, but take what you need

Take care, please remember  
There's an always open door  
Come back for me  
Come back for me  
And take care, go and be that  
That stupid man, and I'll give your love away  
And I'll give your love away  
Then come back for me

Do it, gonna have to let you prove it  
Got a feelin' that you'll lose it  
When you're drunk and with some girl you barely know  
And she's from the year below  
But it feels like I would give you anything to make you feel right  
You don't even look behind to see if I'm alright  
Only one thing that I'm asking

Come on, take care  
Please remember there's an always open door  
Come back to me  
Come back for me  
And take care, go and be that  
That stupid man, and I'll give your love away  
Baby, come back for me

(I'ma let you burn your freedom)

(I'ma let you burn your freedom)  
(I'ma let you burn your freedom)

Take care, please remember  
There's an always open door  
Come back for me  
Come back for me  
And take care, go and be that  
That stupid man, and I'll give your love away  
And I'll give your love away  
Then come back for me
