## **Two Night Town**

**Jason Aldean** 

I just spent three nights in a two night town Suns comin' up and I'm just goin' down Am I ever gonna turn my life around I just spent three nights in a two night town

It was women, it was sinnin', it was alcohol It was everything the Bible says will make a man fall And I didn't wanna little, Lord I wanted it all It was women, it was sinnin', it was alcohol

When am I, ever gonna learn to walk away When the chips are down and the cards ain't fallin' my way Why do I always gotta stay too long till it's too late

I just spent three nights in a two night town With a bunch of lost souls all tryna get found Girl I've been a little crazy since you walked out So I just spent three nights in a two night town

When am I, ever gonna learn to walk away When the chips are down and the cards ain't fallin' my way Why do I always gotta stay too long till it's too late

I just spent three nights in a two night town Suns comin' up and I'm just goin' down But baby this pain is still hangin' around I think I'll spend four nights in a two night town
