

On a Night Like This

Jason Blaine

When the sun goes down
And the moon gets bright
And everybody's feeling just a little bit more than feeling alright
Cause you work so hard now you just can't wait
All you wanna find is a good time after that week long daze

On a night like this
Down an old dirt road
Out by lake there's a place everybody goes
You can see that bonfire burning from miles around
Make a wish beneath the stars
Leaning back staring up from the hood of your car
It's a look it's a touch getting drunk on the rush of that long
slow kiss
People fall in love like that on a night like this

We've got country girls
And some good old boys
Got the speakers on stun cranking Brooks and Dunn making lots of noise
Young hearts on fire sneaking outta sight
They're not talking 'bout forever but they might be together for the rest of their lives

On a night like this
Down an old dirt road
Out by lake there's a place everybody goes
You can see that bonfire burning from miles around
Make a wish beneath the stars
Leaning back staring up from the hood of your car
It's a look it's a touch getting drunk on the rush of that long
slow kiss
People fall in love like that on a night like this

On a night like this
Down an old dirt road
Out by lake there's a place everybody knows
You can see that bonfire burning from miles around
Yeah make a wish beneath the stars
Leaning back staring up from the hood of your car
It's a look it's a touch getting drunk on the rush of that long
slow kiss

People fall in love like that
People fall in love like that
People fall in love like that
On a night like this

Yeah

On a night like this
