

## Wild Eyes

Jefferson Starship

I got a girl with her eyes wide open  
Her vision pierces the sky  
Her name is Angel 'n' she's just like a raven  
Wild eyes  
No one can tell me no no nobody knows  
Where she comes from or where she goes  
Such a dangerous girl with her dreams intact  
Wild eyes

Now now angel  
Now now wild eyes  
Now now angel  
Now now wild eyes

Off the planet and across your brains  
Break the walls I'm in love again  
And even telepathic children  
Have to eat their vegetables  
Wild eyes  
There were days when we linked our arms  
Swayed and sang with our fists in the air  
And as the sirens sang we asked for more  
With wild eyes  
Angel and I need more of what's real  
And we want it now

Like a shadow on the walls of time  
Like a soldier at the walls of troy  
Like a lover at your heart again  
I wanna break through
