

Please Save Us The World

Jennifer Love Hewitt

We are young
but our voices must be heard
Time has come
to hear the children of the world
And all that we are asking for
is air that we can breathe
and oceans safe to swim in
and the forest that still has trees

I truly believe
that the world could live as one
down with the walls
there's a new song to be sung
and all that we are asking for
is air that we can breathe
and oceans safe to swim in
and the forest still has trees

Won't you please save us the world
please save us the world
won't you please save us the world
time is running out for kids like me

Please won't you stand
hand in hand with me
the future is now
to live in global harmony
and all that we are asking for
is air that we can breathe
and oceans safe to swim in
and the forest that still has trees
