## Vapor

## **Jennifer Paige**

I can take you down to everywhere I go Never want to take you down that low Been starin' out my window Into negative space On the pavement from the elevator Down the cornershop to buy the paper Had a premonition you would be there too No way not today It's just more bad news CHORUS I want to be vapor Want to rise above the year I want to be steamy And dry up all my tears Cause with my head in the clouds I'd be light upon my heels I want to be vapor I want to be vapor And disappear sometimes My heart is heavy I feel I'm sinking in My sister tells me that I spread myself too thin Feel like standing in a plaster mold of me What I have is not contagious I see a smile on a passing stranger Think to follow them to see where they go all day Wanna know how it is they get that way CHORUS I want to be vapor Want to rise above the year I want to be steamy And dry up all my tears Cause with my head in the clouds I'd be light upon my heels I want to be vapor I want to be vapor And disappear sometimes I want to be vapor sometimes, oh yeah I could take you down to everywhere I go But I never want to take you down that low Oh no Oh no CHORUS I want to be vapor Want to rise above the year I want to be steamy And dry up all my tears Cause with my head in the clouds I'd be light upon my heels I want to be vapor I want to be vapor And disappear

I want to be vapor I want to be vapor And disappear sometimes

I want to be vapor sometimes I want to disappear
