

Kiss The Moon

Jeremy Fisher

Well my dear I can't seem to sleep tonight
So many thoughts are in my head
So I lay awake and dream
Something big and beautiful instead

And when I kiss the moon
She smiles and I sit for a while
Count the stars until the sky turn blue
I count the stars until the sky turns blue

At night I talk to a girl on a phone
And she reminded me of home
So I told her that I miss her so
And I wonder if she even knows

That when you kiss the moon
She smiles and you can stay a while
Count the stars until the sky turn blue
You count the stars until the sky turned blue

I sure hope this lullaby
Will help you sleep tonight
But if something keeps you awake
Then I recommend that you might try

To kiss the moon 'cause she smiles
And you can stay a while
Count the stars until the sky turn blue
You count the stars until the sky turns blue
