

# Roses Are Red

Jessica Harp

Roses are red and violets are blue  
Will you be happy if I say I love you?  
Sugar is sweet and baby you are too  
I'm going crazy, what can I do?

Do you remember that time  
Remember that place  
Just you and me, oh yeah  
And our dates

Well, it was then that I knew  
I felt those feelings again  
Just like I did way  
Back when

If I tell you that I love you  
Will you love me back  
Well, honey you used to, yeah  
I remember that

Well I am yours and babe  
I wish you were mine  
But the moment's just seeming  
To slip on by  
I wish I could stop it  
Put a hold on time  
And tell you everything  
That I feel inside of me

Would you like a cup of coffee  
Would you like to go out  
Try not to have  
A single doubt

That we could go back to  
How it used to be  
When I loved you and honey  
You loved me

Then you'd hold my hand  
And whisper in my ear  
And I'd start to laugh  
And you'd dry my tears

You'd say: "Honey, don't worry  
We've got each other again  
And we can be so much  
More than friends"

If I tell you that I love you  
Will you hold me tight  
And tell me everything is gonna  
Be alright

Well I am yours and babe  
I wish you were mine  
But the moment's just seeming

To slip on by  
I wish I could stop it  
Put a hold on time  
And tell you everything  
That I feel inside of me

Well I am yours and babe  
I wish you were mine  
But the moment's just seeming  
To slip on by  
I wish I could stop it  
Put a hold on time  
And tell you everything  
That I feel inside of me

If I tell you that I love you  
Will you love me back  
Well honey, you used to, yeah  
I remember that

Well I am yours and babe  
I wish you were mine  
But the moment's just seeming  
To slip on by  
I wish I could stop it  
Put a hold on time  
And tell you everything  
That I feel inside of me

Well I am yours and babe  
I wish you were mine  
But the moment's just seeming  
To slip on by  
I wish I could stop it  
Put a hold on time  
And tell you everything  
That I feel inside of me
