

Gold

Jessie James Decker

Sitting round, passing round that old guitar that daddy gave me
Sharing laughs and raising glasses
Singing with my friends and family
I feel it every time you're near me
And I knew it when you kiss me
I found all the riches in the world

This is gold
I wanna hold and never let go, oh no
Who knows what tomorrow's gonna bring
So right here, right now
Is all I care about

Life's about having nights like tonight
And days like today that never get old
This is gold
This is gold

I took a walk to the seaside
Saw the stars shine in your eyes
Felt the water on my skin
You dared me and I jumped in
Shivering and holding you tight
Looking up into that diamond sky
Found a treasure in the sand
Right here in my hand

This is gold
I wanna hold and never let go, oh no
Who knows what tomorrow's gonna bring
So right here, right now
Is all I care about

Life's about having nights like tonight
And days like today that never get old
This is gold
This is gold

It's a little drink, it's a little stone
It's a little life we make our own
And it's late so we go home

Life's about having nights like tonight
And days like today...

This is gold
I wanna hold and never let go, oh no
Who knows what tomorrow's gonna bring
So right here, right now
Is all I care about

Life's about having nights like tonight
And days like today that never get old
This is gold
This is gold
