

Devotion

Jessie Ware

You used to be so close to me
Everything happened so easily
Life with you is like a dream
Without you there's no way to be

I need your devotion
I need your devotion

Ready to love but do you want it enough
Can we find a way to bring you back again
You say you want to love but do you want it enough
The end of us, it never hurt so much

I need your devotion
I need your devotion

Don't leave me in the dark
Don't leave me this way
Cause nothing's making sense today
I need you in my heart
I need you to stay (I need your love)

I need your devotion
I need your devotion
I need your devotion

Running away, are you running to me
Running away, are you running to me
Running away, are you running to me
Running away, are you running to me
Running away, are you running to me
Running away, are you running to me

I need your devotion
I need your devotion
I need your devotion
I need your, I need your, I need your, I need your...

Running away, are you running to me
Running away, are you running to me
Running away, are you running to me, to me, to me
