

White Lightning

Jill Johnson

Love is like white lightning
feels so good at first
one kiss won't quench your thirst
the more you drink the more it hurts
love is like white lightning

Love is like white lightning
it burns you inside out
you fall you crawl your head'll spin
you won't remember where you've been
love is like white lightning

White lightning
straight to the heart
hits every part of you
makes you forget who you are
take it too far no telling what you'll do

Love is like white lightning
it looks so innocent
It sneaks up on you
then comes on strong
You think you're here and then you're gone
Love is like white lightning, yeah

White lightning
straight to the heart
hits every part of you
makes you forget who you are take it too far
no telling what you'll do

White lightning
straight to the heart
hits every part of you
makes you forget who you are
take it too far no telling what you'll do

White lightning
straight to the heart
hits every part of you
makes you forget who you are take it too far
no telling what you'll do
