

Bridge to Better Days

Joe Bonamassa

You sit in your big house baby
You drive your fancy car

You treat me like I'm not there
But I guess that's who you are

*I'm on the bridge to better days
Better days are coming now

Tired of asking all my friends
Please help me once more

This old life that I'm leading
Got me down the floor

*I'm on the bridge to better days
Better days are coming now
Better days are coming now
Better days are coming now

Gonna be a matter of time
You know the sun will rise

Used to say it was in my head
I was led along instead

*I'm on the bridge to better days
Better days are coming now
Better days are coming now
Better days are coming now
