## **Always On The Run**

## **Joey Tempest**

Its the way we live and its killing me
And the silence here is deafening
Everything is just a lie until you tell the truth
There's got to be another day

We were always on the run
I was always leaving you, you leaving me
Now you never cross my mind
Sometimes

I just know the rain won't change a thing
I'm already lost to sugar and caffeine
Its these days in between I never understand
There's got to be another day

We were always on the run
I was always leaving you, you leaving me
Now you never cross my mind
Sometimes

Its the way we live and its killing me And the silence here is deafening
