## **Joey Tempest**

I'm down the local universe sometimes when I need some space waiting outside heaven simply just to see her face to know the beauty when she moves you might as well explain the sky

cause I feel, just as long as you're out there
I can breathe do anything go anywhere
yes I know just as long as you're out there I try, I try

I can dream what you can see only when I close my eyes so high an aspiration for such an ordinary guy to know the beauty when she moves you might as well explain the sky

cause I feel, just as long as you're out there
I can breathe do anything go anywhere
yes I know just as long as you're out there I try, I try
