Till You Opened My Eyes

John Denver

Down, down, down deeper into love All around, I can feel your love All my life I've been dreaming Night into morning Till you opened my eyes

Love, love, love such a mystery Golden light shining down on me Soft and warm as the warming But I never saw it Till you opened my eyes

Floating in circles, I'm flying It feels so good that I'm crying

Down, down, down deep inside of me Love sweet love's all that I can see Golden light keeps on shining Shining forever, since you opened my eyes
