

# The Noise

John Foxx

Look at me  
I was only trying to see you through the noise  
I was only trying to focus on your voice  
Through the noise  
Through the noise

Now I can see  
Why you turn away so easily  
Though I never understood how you can sleep  
Through the noise  
Through the noise  
Through the noise

Feels so sad  
To watch us moving through our different scenes  
Trying to match the fragments with the dreams  
And I know you would believe me  
If you could see me clearly  
I know that you could reach me  
Through the noise  
Through the noise  
Through the noise  
Through the noise

When we talk  
Interference alters every word  
You can never quite be sure just what you heard  
Through the noise  
Through the noise

So look at me  
I will always try to reach you through the noise  
I will always try to listen to your voice  
Through the noise  
Through the noise  
Through the noise  
Through the noise  
Through the noise  
Through the noise
