I'm in the zone, nigga I washed my face Me being prone to reverse and split in my ways They're enclosed offside see you You missed my fate They're off sides, oh if I could be you Wouldn't miss a day Up and collide with the plan One season don't understand What makes the one feel the essential sum of what is I see through the lens Don't go outside or within The vision extends to what I am given No more, no less I'm in the last part I'm in the first start You end me, we get down When you go up I'm within you My opposite is then round you Life's lines go down I'm around you And he is inside you When you go up I'm within you, baby My opposite is then round you Life's lines go down I'm around you And he is inside you
