If You've Got Love

John Michael Montgomery

If you've got faith And you believe in what you're living for You can stand your ground when the devil's at your door And a little hope can help you when the road is getting rough But there's nothing quite like life if you've got love

If you've got love you can move a mountain A little bit further down the line You can do it all at once or one rock at a time You can turn an ordinary picture into a priceless work of art It's what you can do if you've got love in your heart

Now there's nothing like a real good friend To tell your troubles to But there's just so much a real good friend can do 'Cause it takes another's touch to chase the darkest blues away If you've got love you've got what it takes

If you've got love you can move a mountain A little bit further down the line You can do it all at once or one rock at a time You can turn an ordinary picture into a priceless work of art It's what you can do if you've got love in your heart

If you've got love you can move a mountain A little bit further down the line You can do it all at once or one rock at a time You can turn an ordinary picture into a priceless work of art It's what you can do if you've got love in your heart It's what you can do if you've got love in your heart

(If you've got love) you can move a mountain Further down the line You can do it all at once or one rock at a time You can turn a picture into a priceless work of art...
