

## When You Smile

John Wesley Harding

All you have to do is smile  
And the words just melt away  
And there is nowhere worth going  
And I have nothing to say

When you smile  
Please take off your rings, your watch  
We'll forget time as it's flying  
I can see myself so deep in your eyes  
Can you see yourself in mine

We'll forget just where we are  
If we're anywhere at all  
You're not the only one who's lonely  
I'm not the only one who calls

When you smile  
When you smile at me  
When you smile  
When you smile at me

When the shadows pass above  
Put the sun on let it shine  
And the world revolves you and me  
Its center is just where we lie  
Feels like time will crawl forever  
This little room is everywhere  
But we were made to be together  
And if not it doesn't matter

When you smile  
When you smile at me  
When you smile  
When you smile at me
