

Destiny

John West

In a world full of fantasy, now it's come clear to me
For all that is real is in my arms

Whenever your hearts so far away...
Look to the sky... You know
I'll be waiting

Our love is destiny, this union was meant to be
As sure as the dawn returns to the night
I know that our love is destiny

The coldest december, hearts of fire
I do december
I saw the warmth of your soul, there in green eyes

Whenever your dreams seem far away...
Look by your side... you know I've been waiting

Chorus

Our love is destiny, this union was meant to be
As sure as the dawn returns to the night
I know that our love is destiny

Always in love we'll be... forever, eternity
Your name is emblazoned on my heart

If you ever alone and longing to stray
Look by your side... You know I'll be waiting

Chorus 2x

Our love is destiny, this union was meant to be
As sure as the dawn returns to the night
I know that our love is destiny
