

Mind Journey

John West

The wind whispers as you start to close your eyes
Dream on your way
See the answers how the night can hypnotize
It gets closer every day so look out!

In the shadows when the darkness takes control
You can rest from all your pain
All the mysteries about to unfold
Then the feelin' comes again

Take a journey to the corners of your mind
Live your life or throw it all away
When you look into your mind
Oh the things you'll find
Let your spirit light the way

Walk with me take my hand
I can show you the light
As we spiral down the stairway of your life
Know it's comin' tonight

Take a journey to the corners of your mind
Live your life or throw it all away
When you look into your mind
Oh the things you'll find
Let your spirit light the way
