Leave The Light On

Johnathan Rice

You started over yesterday In dirty rain the sky was so grey You listen to the engine sing And you forget about everything

Let the sun shine Like it's never shined Across a blue sky And watch the time fly

Free all the lonely boys who love no one And dream on through the years and leave the light on

You never felt a night so cold Your angry eyes were tightly shut closed You fell out of love with rock and roll You shot a hole in your radio

Let the sun shine Like it's never shined Across a blue sky And watch the time fly

Free all the lonely boys who love no one And dream on through the years and leave the light on

Don't you dream on
