

I Can't Forget You

Johnny Horton

I can't forget you I've got these memories of you
I can't forget you I'll always be loving you
Once we were happy we were so carefree and gay
Then something happened and you went away

I can't forget you please tell me what must I do
My memories haunt me because I'll always love you
Where are you darling are you with someone new
I can't forget you I'll always be loving you

I can't forget you I've got these memories of you
I can't forget you I'll always be loving you
I can't forget you please tell me what must I do
My memories haunt me because I'll always love you

Where are you darling are you with someone new
I can't forget you I'll always be loving you
