

The Future

Jolie Holland

Everything around here makes me sad
Everything is part of the dreams that we had
That will never be the way we wanted them to be
When we dreamed these dreams that we had

We wanted them to be the future
That is now is not how we dreamed of the future
With a house and a love that I would ride into the future
With my arms around you tight

My love in your heart, my lust on your shoulder
Is like a beautiful [Incomprehensible]
Flashing gallant as a stallion on parade through the city

A beautiful dream, a bohemian love song
That would only sound more gallant as the years would perfect it
But I can see in my heart which is beating in the present here
and now
I can see that this is only a dream

Come on and wake up with me
Hey, come on and wake up with me
Hey, come on and wake up with me

Everything around here is so beautiful
Everything is part of the dreams we will paint
That will never look the way we thought that they would look
When we began to step into the future

From the place that we are standing
It don't look too good right now
But I know you're a wonderful painter
You're a master with your colors

And as mine get fainter and your pallet
There will always be an afterglow of a beautiful dream
That will never be the way we dreamed it to be

But hey, come on and wake up with me
Hey, come on and wake up with me
Hey, come on and wake up with me
Hey, come on and wake up with me
Hey, come on and wake up with me from our beautiful dream
