

# This Is Christmas

Jon McLaughlin

There's something about this time of year  
When everything is sacred  
I want to bottle it up and save it

And all around the sights and sounds you hear  
They're making me nostalgic  
I think about my life and how it's beautiful and it's changing  
But when the snow starts to fall  
I feel like a kid again

We got the wreath hung on the door  
We got gifts piled on the floor  
We got more than we could ask for  
This is Christmas  
There's a fire in the fireplace  
Life running through our veins  
Don't it feel like amazing grace  
This is Christmas

With emotions running wild  
The smiles come easier  
All the feels feel feelier  
And I start acting like a child  
Yeah but if I may say, ain't that kinda the best way to live  
Because we all are changing  
But when the snow starts to fall  
We feel all the same things

We got the wreath hung on the door  
We got gifts piled on the floor  
We got more than we could ask for  
This is Christmas  
There's a fire in the fireplace  
Life running through our veins  
Don't it feel like amazing grace  
This is Christmas

I can't believe that  
This day has come  
We've been talking about it since last year  
It's like a dream that everyone I hold so dear is right here

We got the wreath hung on the door  
We got gifts piled on the floor  
We got more than we could ask for  
This is Christmas  
There's a fire in the fireplace  
Life running through our veins  
Don't it feel so amazing grace  
I feel so amazing grace  
Don't it feel like amazing grace  
This is Christmas
