

# California Sunrise

Jon Pardi

You could hear the wind howling across the ocean  
And the taste of the wine and the buzzed feel in my head  
And the only wifi was burning right beside me  
And we had us a night I'll never forget  
She was a 1960's Beach Boys song  
And we're living that dream all night long

In that California sunrise  
In that California sunrise  
She took me to heaven and so much more  
Like nothing I've ever seen before  
In that California sunrise

Pretty soon it was raining up in Seattle  
And it sure was cold out in Colorado  
Yeah, I was missing her kiss in the heat of Arizona  
Been everywhere and nothing could compare  
Yeah, to that one of a kind trip I was on  
Everything about her felt like home

In that California sunrise  
In that California sunrise  
She took me to heaven and so much more  
Like nothing I've ever seen before  
In that California sunrise  
Take me on back

Found her number in a pocket of my blue jeans  
Picked up the phone and let it ring  
Said "I'm counting down the miles back to you, babe"  
Yeah, I'm heading west on a big old jet plane

Back to that California sunrise  
That California sunrise  
She took me to heaven and so much more  
Like nothing I've ever seen before  
In that California sunrise  
Take me on back  
That California sunrise  
That California sunrise  
That California sunrise  
That California sunrise  
Take me on back
